SUMMARY

B.Tech AI & ML Engineering student at Sage University with hands-on experience building production-scale AI systems, machine learning pipelines, and data-driven applications. Proficient in Python, Scikit-learn, FastAPI, Generative AI, and BI tools including Tableau, Power BI, and Excel. Seeking ML/Data Science/Data Analyst/AI internships (3–6 months) to contribute to real-world AI and analytics projects.

TECHNICAL SKILLS

Programming: Python, SQL (MySQL)

Machine Learning: Classification, Regression, Clustering, Model Evaluation, Feature Engineering, Cross-Validation, Decision Trees, Logistic Regression, Linear Regression, Random Forest, K-Means, KNN

Libraries & Frameworks: Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Streamlit, FastAPI

AI & GenAI: Gemini API, Prompt Engineering, LLM Integration, Multi-Agent Systems, Generative AI, Voice AI

Data Analytics & BI: Data Cleaning, EDA, Data Visualization, Statistical Analysis, Feature Selection, Tableau, Power BI, MS Excel

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, REST APIs

Cloud Platforms: Microsoft Azure, Oracle Cloud Infrastructure (OCI), Google Cloud

Engineering Skills: Software Architecture, Repository Analysis, Context Management, Asynchronous Programming

PROJECTS

NEXUS AI – Autonomous Multi-Agent AI Assistant | *Python, FastAPI, Gemini API, Streamlit, LLMs* | [GitHub](#)

- Architected a production-scale autonomous AI assistant using a modular multi-agent system capable of handling coding, research, project analysis, and conversational tasks at scale.
- Engineered intelligent routing logic between specialized AI agents for context-aware, scalable task execution across diverse domains.
- Integrated voice interaction pipeline using speech recognition and text-to-speech modules for seamless hands-free operation.
- Built conversation memory, session management, and local-first project intelligence with resilient multi-backend execution and priority-based fallback routing.

CreditWise – ML-Based Loan Approval Prediction | *Python, Scikit-learn, Pandas, Streamlit* | [GitHub](#)

- Developed an end-to-end ML web application predicting loan approvals using applicant financial and demographic data with production-ready Logistic Regression inference.
- Built robust preprocessing pipelines covering missing value imputation, One-Hot Encoding, and feature scaling; deployed live on Streamlit Cloud with real-time interactive predictions.
- Ensured production safety through feature alignment, unseen-category handling, and consistent inference-time transformations.

Car Evaluation Classifier – Decision Tree ML Model | *Python, Scikit-learn, Pandas, NumPy, Matplotlib* | [GitHub](#)

- Built a Decision Tree classifier on 1,728 car records achieving 82% accuracy, 86% precision, and 85% recall after hyperparameter tuning.
- Performed feature importance analysis identifying safety as the highest-impact feature; delivered a reproducible end-to-end ML pipeline covering EDA, encoding, training, and evaluation.

EDUCATION

Sage University

B.Tech in Artificial Intelligence & Machine Learning Engineering

Indore, M.P., India

2024 – 2028

CERTIFICATIONS & COURSES

Microsoft Azure Fundamentals (AZ-900) | Microsoft, 2025

OCI Certified AI Foundations Associate | Oracle Cloud Infrastructure, 2025

Google Cloud Generative AI Certificate | Google Cloud Education, 2026
